RUSSIAN ACADEMY OF SCIENCES
DOKLADY. MATHEMATICS

Volume 46, Number 1 January-February 1993

CONTENTS

N. S. Bakhvalov and M. È. Èglit, *On the propagation of small perturbations in weakly heat-conducting and weakly viscous micrononhomogeneous media* 1

N. D. Botkin, *Asymptotic behavior of solutions of differential games. Sets of viability of differential inclusions* 8

V. V. Kisil', *The algebra of two-sided convolutions on the Heisenberg group* ... 12

M. M. Ovezova, *On the solvability of Darboux problems for a hyperbolic system* 17

S. R. Tlyusten, *Multivalent conformal mappings with composite free boundary*. 21

M. R. Èntov, *On real Morsifications of the singularities* D_μ 25

I. M. Gel'fand, M. I. Graev, and V. S. Retakh, *Difference analogs and q-analogs of general hypergeometric systems of differential equations* 30

Vladimir A. Gurvich, *Bilinear forms of enumerated graphs* 36

V. N. Denisov, *On the asymptotics of the solution of the Cauchy problem for parabolic equations* 43

S. A. Lomov, *Pseudoanalyticity and the problem of a mathematical description of the boundary layer* 47

V. S. Rabinovich, *The Fredholm property of general boundary value problems on noncompact manifolds, and limit operators* 53

A. A. Egorov, *On the stability of classes of affine mappings* 59

P. A. Krutitskiĭ, *An explicit solution of the Dirichlet problem for an equation of composite type in a multiply connected domain* 63

I. A. Kuzin, *On some imbedding theorems for Kreĭn-Pontryagin type spaces and their application to periodic problems* 70

A. G. Baskakov and Chan Khy·u Bong [Tran Huu Bong], *Spectral properties of bounded solutions of linear functional-differential equations* 74

M. S. Burgin, *Universal limit Turing machines* 79

S. G. Leĭko, *Extremals of rotation functionals of curves in a pseudo-Riemannian space, and trajectories of spinning particles in gravitational fields* 84

M. Passare and A. Tsikh, *On connections between the local structure of holomorphic mappings, multidimensional residues, and generalized Mellin transforms* 88

E. V. Radkevich and B. O. Èshonkulov, *On the existence of a classical solution of the problem of impregnating glassy polymers* 92

V. A. Andrunakievich and Yu. M. Ryabukhin, *Idempotents and quasiregularity relative to right ideals of algebras* 98

M. A. Atakhodzhaev, *On boundary-interior problems for the biharmonic equation* 103

S. A. Brykalov, *Problems with monotone nonlinear boundary conditions*..... 108

V. P. Zastavnyĭ, *Positive definite functions depending on a norm* 112

V. I. Zubov, *Approximation in the large of bounded continuous real vector-valued functions in the uniform metric* 115

P. A. Krutitskiĭ, *Solution of a hyperbolic boundary value problem as a result of applying the principle of limiting amplitude to an initial-boundary value problem for an equation of composite type*..... 118

F. G. Maksudov and M. G. Gasanov, *On the variational theory of the spectrum of operator pencils* 126

V. V. Napalkov and T. T. Kuzbekov, *On generators in some rings of analytic functions* 131

Yu. V. Netrusov, *Spectral synthesis in spaces of smooth functions* 135

B. V. Pal'tsev, *On fast iterative methods with boundary-condition splitting for a multidimensional system of Stokes type. Periodic "flows" between parallel walls* 139

A. I. Subbotin and L. G. Shagalova, *A piecewise linear solution of the Cauchy problem for the Hamilton-Jacobi equation*..... 144

A. I. Kheĭfits, *The Dirichlet problem in a half-space for the Schrödinger operator with boundary data of arbitrary growth at infinity*..... 149

L. A. Aĭzenberg, *Carleman formulas with a holomorphic kernel and with integration over boundary sets of maximal dimension*..... 153

V. I. Berdyshev, *Polynomial approximation connected with navigation over geophysical fields* 157

S. P. Zubova and V. P. Trofimov, *On particular solutions of a differential equation in a Banach space, with a small parameter on the derivative* 161

V. K. Ivanov and V. P. Tanana, *On the well-posedness of conditionally well-posed problems in locally convex spaces*..... 165

M. I. Imanaliev and S. N. Alekseenko, *On the theory of systems of nonlinear integro-partial differential equations of Whitham type* 169

M. A. Mamedov, *Turnpike theorems for integral functionals* 174

Yu. V. Netrusov, *Interpolation (real method) of spaces of smooth functions with the space of bounded functions* 178

E. M. Russakovskiĭ, *A matrix Sturm-Liouville problem with spectral parameter in the boundary conditions. The theory of V-Bézoutians* 182

Volume 46, Number 2 March–April 1993

CONTENTS

I. L. Barskiĭ, *On the behavior of the spectrum of some linear multipoint boundary value problems for ordinary differential equations. The case of an arbitrary number of points* 187

V. A. Derkach and M. M. Malamud, *Inverse problems for Weyl functions, pre-resolvent and resolvent matrices of Hermitian operators* 190

D. P. Zeragiya, *The existence of a bifurcation point for a class of nonlinear operators* 198

A. F. Lavrik, *An approximate functional equation for the zeta-function and a segment of the Euler product over prime numbers* 201

G. D. Lëvshina, *Some properties of Lipschitz functions in the unit disc and in the unit ball* 205

V. O. Leont'ev, *The asymptotics of the approximation of differentiable functions by a Fourier series* 210

I. V. Mel'nikova and A. I. Filinkov, *The integrated family of M,N-functions* ... 214

B. I. Suleĭmanov, *The Stokes isomonodromy phenomenon and nonlinear effects near a caustic cusp* 220

N. N. Tarkhanov and A. A. Shlapunov, *Bases with double orthogonality in the Cauchy problem for systems with injective symbol* 225

A. Yu. Shadrin, *On sharp constants in inequalities between L_∞-norms of derivatives on a finite interval* 231

E. I. Berezhnoĭ, *Inequalities of Hardy type on cones in ideal spaces* 236

A. I. Vagabov, *Asymptotics of solutions of differential equations with respect to a parameter, and applications* 240

A. V. Glushak and V. D. Repnikov, *On stabilization of a solution of the Cauchy problem for a first-order differential equation in a Banach space* 245

V. A. Gurvich and M. A. Temkin, *Checked perfect graphs* 248

V. P. Tanana, *On the solution of ill-posed problems in locally convex spaces* ... 254

K. Kh. Boĭmatov and A. Sharifov, *Coercive properties of nonlinear Schrödinger and Dirac operators* 258

V. A. Buevich, *On τ-completeness in the class of determinate functions* 264

S. A. Vakhrameev, *Morse theory for a class of optimal control problems* 269

M. V. Volkov, *Semigroup varieties with a modular lattice of subvarieties* 274

A. M. Kytmanov and T. N. Nikitina, *Removable singularities of CR-functions on generic manifolds* 279

A. V. Rybkin, *On a functional calculus for contractions with absolutely continuous spectrum and an operator Carleson measure* 282

M. B. Sevryuk, *Invariant tori of invertible systems in the presence of additional even coordinates* 286

A. I. Tolstykh, *On iteration schemes with noncentered compact approximations* 290

S. I. Shmarev, *On free boundary properties for a class of degenerate parabolic equations of filtration theory* 296

O. Yu. Vorob'ev, *The calculus of set-distributions* 301

M. G. Zavgorodnii and O. Yu. Litmanovich, *An analog of a theorem of Keldysh for a multipoint problem of de la Vallée Poussin* 307

V. I. Zubov, *Differential equations for functions of several independent variables, and their application* 311

V. A. Kostin, *The Cauchy problem for an abstract differential equation with fractional derivatives* 316

G. Yu. Kudryavtsev, *On the time for solution of labyrinth problems by finite automata* 320

O. V. Matveev, *On certain methods of recovering functions of n variables defined on chaotic nets* 324

N. A. Popov and A. N. Popov, *Paradoxes in classical logic* 330

A. Yu. Khrennikov, *Noncommutative functional analysis* 332

A. V. Arutyunov, *Sign-definiteness of quadratic forms of the calculus of variations with a power degeneracy* 337

G. V. Demidenko, *Integral operators defined by boundary value problems for quasielliptic equations* 343

V. V. Zhuk, *On the question of convergence of a trigonometric Fourier series at a point* 349

O. V. Karepov and N. N. Tarkhanov, *The method of Fischer-Riesz equations in the ill-posed Cauchy problem for systems with injective symbol* 354

A. I. Kozhanov, *On properties of solutions for a class of pseudoparabolic equations* 359

K. B. Sabitov and A. Kh. Isyangil'din, *A problem of Tricomi type with a nonlocal conjugation condition for an equation of mixed type* 364

B. Yu. Sternin and V. E. Shatalov, *On a global integral representation of complex-analytic functions on a Stein manifold* 369

A. Yu. Khrennikov, *Axiomatics of p-adic probability theory* 373

M. Z. Berkolaïko and I. Ya. Novikov, *On infinitely smooth almost-wavelets with compact support* 378

R. R. Gadyl'shin, *On a system of imbedded resonators* 383

G. A. Mikhaïlov, *New algorithms of the Monte Carlo method for solving the Helmholtz equation* 387

V. D. Sedykh, *Invariants of convex manifolds* 392

I. L. Sofronov, *Conditions for complete transparency on the sphere for the three-dimensional wave equation* 397

Volume 46, Number 3 May–June 1993

CONTENTS

K. Kh. Boĭmatov, *The generalized Dirichlet problem for systems of second-order differential equations* 403
N. N. Nefedov, *Contrast structures of spike type in nonlinear singularly perturbed elliptic equations* 410
Ya. V. Radyno, Ngo Fu Tkhan' [Ngo Phu Thanh], and Sabra Ramadan, *The Fourier transform in an algebra of new generalized functions* 414
M. I. Tramov, *Oscillatory properties of linear differential equations with deviating argument* 419
L. Z. Fishman, *On preservation of the character of the boundary of the stability region of a continuous system when it is replaced by a discrete system constructed by the Runge-Kutta method* 426
Sh. Yarmukhamedov, *On harmonic extension of continuous functions defined on a piece of the boundary* 431
V. L. Makarov and V. V. Khlobystov, *Hermite interpolation of operators in Hilbert spaces* 436
A. P. Petukhov, *On approximation of functions by convolution operators in the Hausdorff metric* 440
O. V. Davydov, *On the approximation of individual functions by rectangular Fourier sums* 444
S. I. Pokhozhaev, *On the smoothness of solutions of certain superlinear elliptic equations* 448
M. S. Salakhitdinov and A. S. Berdyshev, *Boundary value problems for a parabolic-hyperbolic equation in a domain with deviation from a characteristic* 452
A. V. Bitsadze, *On a hyperbolic system of first-order quasilinear equations* 455
V. V. Vlasov, *On a class of differential-difference equations in Hilbert space, and some spectral questions* 459
S. I. Pokhozhaev, *On sharp a priori estimates for some superlinear elliptic equations* 464
V. A. Prokhorov, *On approximation of analytic functions by rational functions* 469
E. D. Rodionov, *Compact five-dimensional homogeneous Einstein manifolds* .. 473
N. N. Kholshchevnikova, *On the properties of thin sets for trigonometric series and certain other series* 477
